K2

ThinKnx "K2"

ThinKnx K2 is the most powerful controller of the Trend Line. It is the perfect solution either as a stand-alone server for small installations or as a Client of the Pro Line.
K2 is even equipped with a microphone and speakers that make it a VoIP Doorcom station compatible with major brands on the market.
The 5.5″ screen has embedded temperature and humidity sensors allowing it to be used as a thermostat, for the management and setting of temperature in each room.The graphic is characterised by an unlimited number of pages and a full set of predefined widgets, fully customised by the end user even with favourite pages.
It is available in Black or Silver colour.
